Umair Nadeem

SQA ENGINEER

Profile

Dedicated and detail-oriented **Software Quality Assurance Tester** with over 3 years of experience in ensuring the delivery of high-quality software solutions. Proficient in **manual testing**, **test planning**, and **bug tracking** across web and mobile applications. Skilled in creating comprehensive test cases, performing cross-browser compatibility checks, and validating APIs using tools like **Postman**. Adept at collaborating with cross-functional teams in **Agile environments** to meet tight deadlines and deliver defect-free products. Passionate about enhancing user experiences and continuously improving testing processes to align with project goals and client expectations.

Employment History

Senior QA Engineer, Adrem Technologies, Islamabad

NOVEMBER 2023 — PRESENT

- **Manual Testing:** Conducted functional, regression, smoke, and usability testing for web and mobile applications to ensure defect-free releases.
- **Test Documentation:** Developed comprehensive test plans, test cases, and test scripts aligned with project requirements and deadlines.
- **Bug Tracking:** Identified, documented, and tracked bugs using tools like Jira and Trello, collaborating with developers for timely resolution.
- **API Testing:** Performed API validations using Postman to ensure proper integration and data flow between services.
- **Collaboration:** Worked closely with product managers, developers, and other stakeholders to clarify requirements and improve product quality.

Senior QA Analyst, Workbox Pvt Ltd, Peshawar

AUGUST 2021 — OCTOBER 2023

- Led QA efforts, including standup and retrospective meetings, to ensure effective team communication and collaboration.
- Prepared detailed bug reports using tools like Jira, identifying and documenting UI/UX and functional issues.
- Developed and executed end-to-end test cases and scenarios to validate application functionality.
- Wrote and maintained automated test scripts in various frameworks, improving testing efficiency.
- Created technical documentation, including test plans and workflows, to support project goals.
- Managed workflows using project management tools, ensuring timely task completion.
- Generated weekly and monthly project progress reports to track milestones and communicate updates.
- Collaborated with development teams to resolve issues and deliver high-quality software products.
